

Job Description

Last Name	CHEEWAJORN
First Name	WARANON
Sub-Division	Inspections Compliance and License Enforcement Sub-Division
Supervisor	SONGSAK WIMONKITTIPHONG
Position Title	GMDP Lead Inspector

Essential Job Duties and Responsibilities

- Consider complexity of the site to-be-inspected, its manufacture and product risk to identify number of inspectors and number of inspection days required.
- Identify specific inspectors and/or subject matter expert to form the inspection team and call for team meeting to inform, discuss and prepare pre-inspection activities.
- Appropriately assign area of responsibilities (area to be inspected) considering each inspector's knowledge and skill in each particular area.
- Schedule and coordinate to make necessary arrangement with the site to-be-inspected.
- Lead the team to conduct on-site inspection and/or table-top GMP assessment by evaluating manufacture, quality systems and controls in accordance with Thai Food and Drugs regulations, PIC/S Good Manufacturing Practices (GMP) standard, relevant policies and Standard Operating Procedures (SOPs).
- Lead and guide the team to present a detailed factual report on the manufacture, quality systems and controls of the manufacturer being inspected/assessed reflecting the observations (both positive and negative) of the standards of manufacture, quality systems and controls applied to specific products.
- Lead the team to discuss and arrive with and/or exercise objective judgment in determining manufacturer site compliance based on and supported by identified objective evidences.
- Take key responsibility and lead the team to communicate overall inspection/assessment results through written inspection/assessment reports to manufacturer within a specified timeframe as well as provide updates to management as needed.
- Take key responsibility and lead the team to manage post-inspection/assessment activities, review and follow-up on overall necessary agreed corrective and preventive action implementation addressing the deficiencies identified.
- Ensure all relevant document and records concerning GMP inspection/assessment are collected and are properly kept in a well-controlled storage area.
- Lead inspection team to inspect and investigate quality problem related to safety of medicinal products in compliance with PIC/S GMP standard and take samples for testing.
- Lead and provide academic and/or technical advice and training to correct/improve manufacture, quality systems and controls to manufacturer, encouraging the manufacturer to comply with PIC/S GMP and upgrading Thai medicinal products manufacturing industry standard.
- Take key responsibility to provide guidance, coaching and training to develop and continuously improve his/her team member GMP knowledge, inspection technique and skill.
- Conduct annual performance evaluation with his/her team member.
- Execute other duties as may be required and assigned by the Director of Bureau of Drug Control.
- Lead in development, periodic review, revision and implementation of PIC/S GMP standard, relevant manual and SOPs as required.
- Lead and provide GMP training to relevant or new recruited staff as well as to the industry.
- Work in close collaboration with Quality System Management unit, set, track, review and analyze GMP inspection performance standard or KPI, and make recommendation for improvement.

Minimum Qualification

- Be a staff of the Food and Drug Administration, holding the position of pharmacist or a related position, at the professional level or above, or possess the qualifications to submit scientific documents for evaluation to qualify for the professional level position.
- Bachelor's degree in pharmacy or a related field.
- 5 years of experience as an inspector, or have been in government officer for 9 years or more, with experience in GMP inspection for not less than 72 times or 144 working days.
- Completed training in basic knowledge of manufacturing, GMP guidelines, and inspection techniques for evaluating the production of high-risk products, such as sterile products (Sterile Products), biological products, and other general risk pharmaceutical products for not less than 20 hours.
- Be knowledgeable in GMP guidelines.
- Completed the Lead Inspector training course for not less than 20 hours.
- Have been assessed for performance by QSM according to the specified criteria.
- Have been appointed by the Director of the Medicines Regulation Division as a Lead Inspector.
- Be a person with no conflicts of interest with the entity being evaluated.
